DEMO FIXED DEPOSIT RECEIPT (FDR)

Synthetic test document for DepositFlow portal · Instrument evidence upload

DEMO / SYNTHETIC DOCUMENT — NOT A BANK-ISSUED CERTIFICATE
This document is fabricated solely to test file upload, malware scanning, SHA-256 fingerprinting, OCR/text extraction, and review submission in a software demonstration. It does not prove that an FDR exists and must not be used for financial, regulatory, or banking purposes.

1. Instrument details

Field	Demo value
Instrument type	Fixed Deposit Receipt (FDR)
FDR number	FDR-2026-999
Institution / depositor	DEMO INSTITUTION — TEST RECORD
Programme	Engineering and Technology
Issuing bank	DEMO NATIONAL BANK (FICTIONAL)
Branch	Bhubaneswar (demo branch)
Principal amount	INR 35,00,000.00 (Thirty-five lakh rupees)
Issue date	01 January 2026
Maturity date	01 January 2027
Validity end date (demo)	01 January 2028
Regulatory security period ends (demo)	01 January 2028
Renewal action due (demo)	01 December 2026

2. Test assertions for portal extraction

Expected extracted field	Expected text
FDR number	FDR-2026-999
Amount	35,00,000.00 / INR 35,00,000
Bank	DEMO NATIONAL BANK
Branch	Bhubaneswar
Issue date	01 January 2026
Maturity date	01 January 2027

3. Expected scan behavior

For a normal PDF containing text, the portal should accept the file if its file-type and size rules are met, run the configured malware scan, compute a SHA-256 file fingerprint, and attempt text extraction. This document is intentionally plain and contains no embedded scripts, attachments, or active content. The actual scan result depends on the portal's configured scanner and processing pipeline.

4. Test record

Case reference: FDR-2026-999 (demo) | Evidence category: Instrument
Upload timestamp: to be generated by the portal
Malware scan status: to be generated by the portal
SHA-256 fingerprint: to be generated by the portal
Text extraction status: to be generated by the portal

Reminder: a clean malware scan only indicates that the configured scanner did not detect malware. It does not authenticate the bank, validate the FDR against bank records, or establish regulatory compliance.
